## *The Path of Honesty*

Honesty is a clear path,  
Guiding us through the fog of confusion.  
It asks for courage,  
To speak our truth,  
Even when silence tempts us.

In a world full of noise,  
Where falsehoods blend into the background,  
Honesty stands out,  
A beacon of integrity,  
Unwavering and bright.

Trust is built on this foundation,  
Strong and enduring.  
When we are honest,  
We show respect,  
Not just for others,  
But for ourselves.

Deception might offer shortcuts,  
A brief moment of ease,  
But it erodes the bonds we share,  
Weakening the trust  
That holds us together.

Being honest means facing reality,  
Accepting our flaws,  
Embracing our strengths,  
And acknowledging our mistakes.  
It means living with a clear conscience,  
Unburdened by the weight of lies.

Every choice we make,  
Every word we speak,  
Reflects our commitment to truth.  
In honesty, we find strength,  
A quiet confidence  
That cannot be shaken.

Let honesty be our guide,  
In every interaction,  
In every decision.  
For in truth, we find clarity,  
In integrity, we find peace,  
And in honesty, we discover  
The best version of ourselves.

# Sharing Makes Everyone Happy

Once upon a time in a small village there lived a little squirrel named Sam. Sam loved to collect nuts and store them in his tree house. One day Sam found a huge pile of nuts under a tree. Excited, he started collecting nuts as many as he could without thinking of others. Soon, Sam noticed his friends Benny, the rabbit and Lila the mouse searching for nuts too. But the pile was almost gone. Feeling guilty, Sam realized that he had taken more than his share. He decided to share his nuts with Benny and Lila. Seeing Sam's kindness Benny and Lila happily shared their findings with him too. Together they had enough nuts for making everyone happy. From that day Sam, Benny and Lila always shared their nuts and taught the joy of sharing to everyone in the village.

# MATHEMATIC

Down with old Pythagoras  
And down with rotten Maths  
Down with Archimedes  
And drown him at the baths.

If anyone had to do it  
I'd make sure it was me  
First I'd wholly immerse him,  
Then kick him up a tree.

When he had been disposed of,  
I'd turn on old Pythag  
I'd drag him through a holly bush,  
And he'd come out like a rag.

Now my pipe dreams over,  
And I've nothing more to say  
Expect that Maths still lives on  
To be taught another day.

S. Amshula

# 15 Exotic Animals

1. Raccoon
2. Ferret
3. Turtle
4. Sloths
5. Dik-dik
6. Axolotl
7. Squirrel
8. Seruals
9. African civet
10. Fennec fox
11. Baboon
12. Chimpanzee
13. Bear
14. Gecho
15. Agouti

## Raccoons :

- Raccoons have an average of 5 years in the wild.
- They are very agile climbers
- They are preyed on by coyotes, wolves, hawks and aols.
- They are nocturnal animals.
- They have excellent night vision

## Ferrets :

- A ferret's normal heart rate is 200 to 250 beats per minute.
- The average lifespan of a domestic ferret is eight years.
- They are most active at dawn and dusk.
- They were domesticated about 2600 years ago.

## Fennec foxes :

- They are the world's smallest fox.
- They have diverse social lives.
- Fennec foxes have adapted to limited water.
- It has multipurpose ears.
- They have extra fur on their feet.

## Bears :

- Bears have thick layered coats.
- They are big strong and fast.
- Bears have high IQ
- Bears can walk on their hind limbs.
- There are eight bear species in the world.

# Quotes by our leaders

“Happiness is when what you think, what you say and what you do are in HARMONY”.

“Dreams are not those which comes while we are sleeping, but dreams are those when you don't sleep before fulfilling them.

“Freedom is not given it is taken”

“Love is an endless mystery, because there is no reasonable cause that could explain it”

*Asmi John

# The Thief That Takes All

Can you guess. what's the greatest thief of all time? Well, the answer is there in the above line.... Of course, time is the greatest thief in the world!

It goes past us. Without even muttering a word

Neither world war, nor great Hitler can catch this little thief,  
Neither Napolean, nor the great Alexander can control this thief.

If not great warriors, do you know who can defeat time?

Well, the answer is you human!

Does it mean if not great warriors, how can you?

A disciplined person can manage his time.

An undisciplined person, well .... He'll be covered with grime !

Though time is a thief, it is also a teacher,

Which teaches us to become punctuality's archers and to have self love within yourself....

Asmi John  
XII-Med 2

# School Life

Halls of learning, where dreams are made,  
Where laughter echoes, and memories are played,  
A time of growth, discovery and might,  
Where friendships bloom, and futures take flight.

The chalkboard's scribbles, a symphony of thought,  
Lessons learned and wisdom brought,  
Teacher's guidance-with patience and care,  
Helping minds grow and futures share.

From textbooks to tales, of adventure and might,  
School days are treasures, to cherish in sight,  
So let us embrace, these formative years,  
And hold dear the moments, through laughter and tears.

For in these halls, our stories unfold,  
And the best chapters, are yet to be told”.

*Aydin Shaan  
XII-Med*

# Famous Sayings of Eminent Personalities

“Education is not the learning of facts, but the training of the mind to think”.

Albert Einstein

“Man needs his difficulties because they are necessary to enjoy success”.

APJ Abdul Kalam

“I have not failed, I've just found 10,000 ways that won't work”

Thomas Alva Edison

“The best way to predict the future is to create it”.

Abraham Lincoln

## Blue

When my sky was painted Black,  
You promised me to paint it Blue,  
But why would you promise?  
When you know you wouldn't do that;

Thought you could have kept up with your words,  
You chose not to,  
Then why would you?  
Why did you do this to me?

You knew I had gone through a lot,  
You knew I couldn't handle it all,  
You knew I have been scared my whole life,  
But tell me, why would you promise me?

*Annlin Steffy W  
XII-Med 2*

# Night Falls

When the scorching sun you down,  
And nothing is found,  
When everyone's eyes begin to sleep,  
As nothing, stays up for a little pup,  
Your mind shutting down from a good day's work,  
As you take deep sighs,  
Or when you cry,  
Nature's respiration takes place,  
Where everything is calm and starts a new phase,  
Tranquility and content is thought,  
When you're laying in a king size  
As the dinner's atmosphere lights,  
Go back to your bed and say,  
'Night, night'.

*R. Jeffie

# CYBER BULLING

In this world of today where internet facilitates, instant communication and global connectivity lives become easier for everyone. But a darker side turks beneath the surface. Cyber bullying transcends boundaries, Invading the sanctity of homes and personal space. From this one will often experience emotional distress, anxiety and depression. Empowering victims inudes creating safe spaces where they can report incidents without fear of retaliation. Counseling services should be readily accessible to provide emotional support and guidance. As Cyber bullying requires a multi – faceted approach involving collaboration among educators, the parents policy-makers and technology companies. The key strategies include:

Form education and Awareness on Cyber bullying. Policy development on cyber bullying and support services for the victim on cyber bullying, Parent involvement. As Cyber bullying is a complex issue that demands collective action and awareness on by fostering a culture of respect and empathy both online and offline, we can work towards

Creating a safer digital environment for everyone. Let's strive towards a future where every individual can navigate the digital world free from fear and intimidation, where Kindness and respect over hate and cruelty.

*Alan Geno*

# Riddles

1. If I drink, I die. If I eat, I will grow. What am I?  
Fire
2. What Room has no Door or windows?  
Mushroom
3. I am a colour, but you can eat me. What am I?  
Orange
4. What comes once in a century, twice in a lifetime?  
The letter 'E'
5. You are my Brother, but I am not your Brother, who am I?  
Sister
6. What kind of table can you eat?  
Vegetable
7. What starts with an 'E' but has only single letter in it?  
An Envelope
8. I become smaller every time I take a bath, what am I?  
Soap
9. I have no feathers, but I fly at night and sleep by Day. What am I?  
Bat
10. What is an Astronauts' favourite key on a keyboard?  
Space

# A Father's Embrace

Hands calloused and worn from the passage of time  
Yet gentle when holding a small hand of mine  
A voice that's a harbour in life's raging storm,  
A presence that keeps the world safe and warm  
He carries the burdens unseen and unheard,  
With silent resolve, without need for a word.  
His laughter is rare, but it lights up the room  
Dispelling the shadows, rasing the gloom  
Today we give thanks for the lessons he has shared,  
For the quite support that showed  
They cared. In laughter and tears,  
Through has and through strife,  
They etched out a path for a meaningful life.  
Today and forever, their impact remains.  
In the hearts of their children, their essence sustains.

Andrew J

# School Days

Growing up in this day and age  
With free expression all the rage  
Our young ones learn when starting  
School that reading's fun and Maths is  
Cool while writing's not the least bit  
Boring it really is so much like drawing  
For every child it is essential  
To realize they are full potential  
And teachers always do their best  
To stimulate their interest  
When years of school days end at last  
With all examinations passed,  
With the children reminisce  
And say, "Our school days we will miss"  
And as the fine day arrives,  
They were the best days of our lives.

# Time

I just revolve around it  
Or dose it?  
I never understood you,  
You were always a mystery.

You made me think all day  
And you never thought of me anyway  
Still I feel for you;  
I want to keep you mine.

You made my day  
When you were never mine  
You were by my side I believe  
For what I am today

You were always a mystery,  
I think I understand you  
Now!

Akhil Shan M.S

## Deinosuchus:

### The Terror of Ancient North America

The Deinosuchus was a truly terrifying creature. Imagine a giant crocodile, the size of a T-Rex, lurking in the swamps and rivers of North America millions of years ago. Living 73 to 82 million years ago, Deinosuchus means “terrible crocodile” and it lived up to 8,000 pounds. That’s bigger than any crocodile or alligator that has ever lived. Deinosuchus had a massive skull with thick bones and powerful jaws. Its teeth were serrated and designed for crushing bones. Its prey likely included fish, turtles, dinosaurs and even other Deinosuchus. Deinosuchus was an apex predator, meaning it was at the top of the food chain. It likely lived a solitary life, ambushing its prey from the water. With its powerful jaws and crushing teeth, Deinosuchus could easily take down even the largest dinosaurs. It might have gone extinct due to predator wars or natural calamities.

# Airbus A380-The one and only 'Super Jumbo'

The Airbus A380 is one of the greatest technological marvels of the aviation world. It is a familiar sight across major international airports all around the world. It is easily recognizable by its fully double-decked fuselage and four Rolls-Royce engines. This aircraft holds the record for the heaviest and the largest passenger aircraft ever built. With a maximum take off weight of about 570 tons and a capacity of 570 to 800 passengers with cargo, it dwarfs every other passenger aircraft in the sky. It entered commercial service in the early 2000s and around 250 of them are still flying today all around the world. This plane is the 'flagship' of many leading airlines around the world like Emirates., Qatar, Singapore, Airways, Airlines, ANA, Qantas, Lufthansa etc. Emirates has the most A380s in its fleet, with around 120 of them.

The A380 is known to passengers for its spacious and quiet cabin. It can seat 10 in a single row in Economy, one of the highest seatings in all passenger aircrafts. It has a wingspan of 250 feet, which caused many airports to upgrade their terminals and widen their runways to accommodate this giant aircraft. It can fly nonstop across continents, with a range of 15,700 kilometers (9,200 miles). People loved to fly in this aircraft, especially pilots who found the controls of this aircraft to be very easy. The aircraft has a spacious cabin allowing for more legroom, comfort and an enjoyable flying experience. Some airlines have even customized their A380s to include a bar, a customs-free shop, or even a multi-cuisine restaurant. The A380 is truly a masterpiece in the eyes of Av geeks and people in the aviation industry. Sadly, airlines around the world are slowly retiring this aircraft due to high maintenance costs and less sales of tickets, and its manufacturer Airbus Industry has already ceased its production due to cost overruns. The A380 will become an antique by the end of 2025, but for now, it is one of the most popular aircrafts in the sky, connecting continents and people across the world and bringing them closer.

# Broken Yet Beautiful

People ask me why I love sunset,  
As they mean everything has an end;  
But it tells that whatever happens all day,  
A beautiful end can help it mend.

I love how the lonely clouds,  
Strand in the sky, distorted;  
And I realise that's the most,  
Glorious thing I spotted.

Broken doesn't mean it is the end,  
If its for things or people;  
As they are still left with pieces,  
Though broken, much more beautiful!

*Angelin Jenifer R.S  
XII-Med 2*

I don't know where it started,  
But I am sure it cannot be ended

It is not something,  
You can be happy about having

It is friendship  
The reason for all TROUBLE-ship.

Its like a mustang car,  
Which leaves a lifetime scar,  
Whose remembrance gives happiness,  
Although, its filled with bitterness.

Sometimes it can be nasty,  
But never ever hasty

Its not a normal human love,  
But more sacred than any love

It is the trouble ship,  
A real-true friendship.

# Did you know trees can communicate?

Trees talk; their roots are connected through an underground network of fungi, nicknamed as the “wood wide web”, that allows them to share resources with each other. They ‘talk’ by transmitting nutrient to one another through the fungi. For instance, a mother tree, or the oldest and the strongest tree in the forest, will share some of her sugars with smaller nearby trees. Incase of a drought or insect attack, they warn the other trees by sending signals.
